

TNC Virtual Neurocolloquium

Thursdays, every two weeks, 5:00-6:30 pm CET

streamed via Zoom and Youtube

PROGRAM winter term 2020 / 2021

05.11.2020 **GTC Students' Favourite**

Dr. Maria Victoria Puig

Institut Hospital del Mar d'Investigacions Mèdiques (IMIM), Barcelona, Spain

„Prefrontal-Hippocampal Circuits as Target for Cognitive Amelioration in Brain Disorders“

Host: Marta Vilademunt (Graduate Training Centre for Neuroscience)

19.11.2020 **Bernstein Lecture**

Prof. Gordon Berman

Department of Biology, Emory University, Atlanta, USA

„Measuring the hidden dynamics of animal behavior“

Host: Prof. Jakob Macke (University of Tübingen & Max Planck Institute for Intelligent Systems)

03.12.2020 **Hertie Lecture**

Prof. Gustavo Deco

Center for Brain and Cognition, Computational Neuroscience Group, Universitat Pompeu Fabra, Barcelona, Spain

„Awakening: Predicting external stimulation to force transitions between different brain states“

Host: Prof. Ulf Ziemann (Hertie Institute for Clinical Brain Research)

28.01.2021 **Max Planck Lecture**

Prof. Sean Hill

Krembil Centre for Neuroinformatics at the Centre for Addiction and Mental Health (camh), Toronto, Canada

„A multiscale approach to brain disorders“

Host: Shervin Safavi (Max Planck Institute for Biological Cybernetics)

11.02.2021 **TNC's Favourite**

Prof. Jürgen Knoblich

Institute of Molecular Biotechnology (IMBA), Vienna, Austria

„Modeling human development and disease in cerebral organoids“

Host: Dr. Simone Mayer (Hertie Institute for Clinical Brain Research)

25.02.2021 **Center for Mental Health Lecture**

Prof. Sheena Josselyn

SickKids Research Institute, Neurosciences & Mental Health, Toronto, Canada

TTBA

Host: Dr. David Slabik (Center for Mental Health)
